

CAPABILITY STATEMENT

THE ART OF ENGINEERED ACCESS

ABOUT US

OUR PURPOSE

The Art of Engineered Access

Why Paragon Scaffolding? Because we own your project delivery. We have invested in every part of the Paragon business meaning that what we bring to your project is ours.

We have total control and flexibility to deliver on your project, especially when the going gets tough. You can expect on-time delivery, genuine customer service and a stringent focus on safety in design.

Details matter to us so whether it's in-field, in-logistics, or in-office we rigorously follow custom processes to maximise results.

It's both an art and a science.

OUR MISSION

A Western Australian respected scaffold company of choice for reliable, safety in design, innovative and efficient solutions.

OUR VISION

To be the most solutions based and effective scaffold company available that can deliver on quality and scale.

ABOUT US

OUR STORY

Founded in 2015, Paragon Scaffolding is a certified Western Australian privately owned company. Paragon brings together leaders in management and craft skills encompassing all facets of scaffolding and project management, across a variety of projects, including the Gorgon and Ichthys mega projects.

Our company was founded on, and continuously builds on, the belief that a scaffolding company can deliver strong results for a client whilst treating its team members with respect, care and providing career development guided by a “promote from within culture”. Our reputation as a thorough, reliable and quality service provider is evidenced through the consistent repeat business of our clients.

OUR COMMITMENT TO SAFETY

Our safety systems are robust. Paragon and its employees take great pride in our exceptional safety record. We continue to challenge ourselves and our partners to improve on safety and quality on every project, every day.

We encourage 14 day scaffold inspections for all our industrial and high risk projects. This recommendation has supported great results for our clients inclusive of Federal safety audit success.

“Paragon Scaffolding encourages our teams to ask questions and to verify that our structures are built correctly and to design. A 15-minute pause of works can prevent incidents in their tracks.”

– Kent Manos, Managing Director

SECTORAL EXPERTISE

TACKLING THE SIMPLEST TO THE MOST COMPLEX PROJECTS.

ENERGY

Our Energy sector experience has developed to include significant concurrent contracts at both Waste to Energy (WtE) construction projects in Western Australia, the first of their kind for Australia. Through our delivery of these and other energy projects we have established ourselves as a respectable and dependable service provider for significant project works.

INDUSTRIAL

Industrial projects often require scaffolding designs that integrate into the plant to facilitate construction or maintenance. Scaffolding needs to be designed and engineered for a 'fit right first' principle that allows for the construction methodology without costly re-works. Safety in design is paramount as is the use of industry leading materials to maintain the highest safety standards and safety factors.

MINING

Key to maintaining mining process infrastructure is access. Well designed and executed scaffold within the mining environment leads to significant reductions in time for scheduled maintenance and drives greater profitability for our clients. Paragon has been part of numerous maintenance projects where our design and execution has significantly reduced scaffold durations. Our interactive designs allow our clients to conduct in-depth reviews prior to our professionals erecting in-field, to ensure it is right first time. Paragon has executed access for maintenance projects throughout Western Australia.

SECTORAL EXPERTISE

INFRASTRUCTURE

Paragon Scaffolding was founded in infrastructure with our initial project award being access labour and materials for the new Perth Stadium 2015-2017. Since then, we have been part of many significant infrastructure projects through repeat and strategic client alliances in Western Australia.

DEFENCE

Being part of the defence ship manufacturing in Henderson, Paragon understands the rigours and expectation on defence work. Our consistent team of highly qualified professionals have kept scaffold delivery on track and without incident for WA's most important naval vessel construction project of its time.

COMMERCIAL

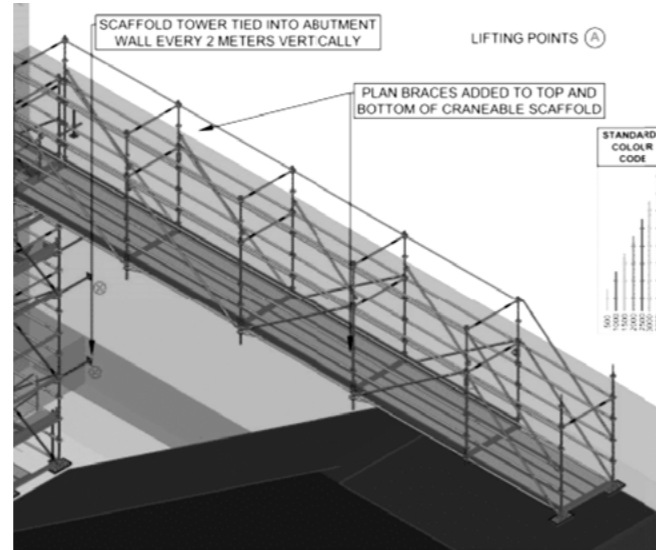

Ranging from smaller custom builds, high security prisons and significant high-rise developments, Paragon has extensive experience in design and delivery of commercial and heritage project scaffold. Many factors make a successful commercial scaffold and one of those is elimination - we often talk our clients out of using scaffold if we don't believe it's the best solution. Where scaffold is required, we offer various methods to maximise the efficiency and reduce modifications. Where space is a constraint, we offer cantilevered loading bays, 10KPA gantries, site office stacking, ramps for traversing machines, temporary roofing, typical containment sheeting, edge protection, emergency access and site access over live roads.

OUR CAPABILITIES

DESIGN & ENGINEERING

Through our experience in industry, we have found quality design and engineering to be the basis of good scaffold. To this we apply our high attention to detail in our scaffold drafting to ensure problems are solved before jacks are placed on soleboards and the most efficient configurations are delivered.

Our Design team have worked extensively as scaffolders prior to their shift to drafting, this ensures real practical, safety in design.

At Paragon Scaffolding, doing it right is a habit supported by process. We create bespoke solutions built from strong foundations. Our capabilities are backed by quality products, industry training and dedicated people.

LABOUR HIRE

Our business is built on the ability to scale up and down to meet our client requirements. Whether it's a last-minute addition to the scope of works, a planned outage or project package, we have a team of seasoned professionals and project leads who can deliver your scaffold requirements. Paragon has built a workforce of scaffold professionals as our core team. When we hire, we ensure we supplement new recruits with experienced professionals to ensure our clients get the authentic Paragon experience.

CUSTOM SCAFFOLD SOLUTIONS

We take the time to listen and learn our clients' needs. That's how we anchor long-lasting relationships. Every scaffolding job is customised to client requirements. We stock Layher Allround, Flexbeam, FW, Kedar, Protect roofing and Geda bin chutes, conventional tube & fit, and Quickstage scaffolding with more than 5,700 tonnes of material in stock.

FALSEWORK/ SHORING/ PROPPING

A by-product of Paragon's success are our falsework solutions. Our primary scaffold product Layher Allround is well suited to high loads. This pairing enables our clients to receive falsework design, supply and install all under one contract and one point of contact, gaining greater efficiencies from having less systems onsite. We can organise third party pre-pour inspections to keep all the falsework under one contract.

Paragon has provided significant falsework and propping for lithium plants, bridge decks in lieu of Tee roff beams, waste to energy plants, train stations, water treatment plants, and mine process facilities.

OUR CAPABILITIES

PLANT HIRE

When you require more than just scaffold, we have an ever-growing plant and equipment division to support our service offering.

SKYLOTEC HEIGHT SAFETY EQUIPMENT

We're an official distributor of quality German-manufactured height safety equipment.

Our extensive capabilities and staff expertise are backed by:

- 100+ scaffolders, riggers, leading hands, supervisors, superintendents, scaffold inspectors and project management
- 5700+ tonne of scaffold equipment: Layher, tube & fit, and Quickstage
- A logistics fleet of trucks, forklifts, and telehandlers
- A 22,000 SQM facility for off-site pre-assembly, materials storage, and scaffold trainee skills accelerator events
- Inhouse scaffold design and drafting services
- Management and safety systems certified to ISO 9001 and ISO 45001
- A digital safety management system with a scaffold register and tracking system, enabling full transparency for our clients.

SELECTED PROJECTS

To view more of our projects, please visit our website
www.paragonscaffolding.com.au

KWINANA WASTE TO ENERGY PLANT

Location: Kwinana, Western Australia

Duration: 2019 - Current

Peak Tonnage: 1200+

Peak Staff: 75+

Sector: Energy | Industrial

Solutions: Scaffold management | Labour (scaffolders and riggers, yardmen, inspectors) | Material supply | Design and engineering | Boiler scaffold | Falsework | Layher FW Gantry | Temporary Roofs | Propping | Plant hire | Skylotec Height Safety Equipment

MT HOLLAND MINE SITE

Location: Southern Cross, Western Australia

Duration: 2022 - Current

Peak Tonnage: 150

Peak Staff: 18

Sector: Construction | Commissioning | Maintenance and Shutdowns

Solutions: Scaffold management | Falsework | Cranable stair access | Edge protection | Scaffold design | Engineering | Trucks | Adhoc other supply

WORSLEY ALUMINA PLANT

Location: Worsley, Western Australia

Duration: 2016 - Current

Peak Tonnage: 500+

Sector: Industrial | Mining

Solutions: Scaffold equipment | Labour hire | Design and engineering | Bridges | Loading platforms | Calsiner scaffolds | Skylotec Height Safety Equipment

EAST ROCKINGHAM WASTE TO ENERGY PLANT

Location: East Rockingham, Western Australia

Duration: 2021 - 2022

Peak Tonnage: 120

Peak Staff: 12+

Sector: Industrial | Energy | Infrastructure

Solutions: Scaffold management | Labour | Design and engineering | Scaffold equipment | Plant hire | Falsework | Skylotec Height Safety Equipment

KWINANA LITHIUM PLANT

Location: Kwinana, Western Australia

Duration: 2021 - Current

Peak Tonnage: 650

Peak Staff: 35

Sector: Construction

Solutions: Scaffold management | Falsework | Cranable stairs | Tube and fit | Digital inspections | Plant hire | Dry hire

NEWEST ALLIANCE

Location: Yanchep to Cockburn, Western Australia

Duration: 2020 - 2025

Peak Tonnage: 650+

Peak Staff: 12

Sector: Industrial

Solutions: Scaffold management | Falsework | Cranable stair access | Edge protection | Scaffold design | Engineering and 3rd party onsite sign-offs | 1m lift process

WAITSIA GAS STAGE 2

Location: Dongara, Western Australia

Duration: 2022 - 2024

Peak Tonnage: 1000

Sector: Industrial

Solutions: Dry hire | Shoring | Public access scaffold | Cranables | Scaffold design and engineering

CAPE LAMBERT WHARF REFURBISHMENT

Location: Pilbara Region, Western Australia

Duration: 2020 - 2022

Peak Tonnage: 150

Peak Staff: 8

Sector: Infrastructure | Industrial | Mining

Solutions: Scaffold equipment | Labour hire | Wharf scaffolding | Vertical and horizontal pile clamps | Layher Allround

SPONSORSHIPS

Paragon Scaffolding are committed to supporting local community organisations and initiatives, such as Cockburn City Soccer Club, South Perth Rugby League Club, Kwinana Little Athletics Centre and U19s WA cricketer Kai Orr.

Get in touch to discuss how Paragon can help your organisation.

If you want to understand the Paragon experience, we can put you in touch with one of our longstanding clients in your sector, giving you confidence in our delivery.
